

## Lab 9 Rules Display

---

Create a program that reads a list of rules from a file and displays them. Your output should exactly match the output below. This program does not take any user input.

### Console

```
Pig Dice Rules:  
* See how many turns it takes you to get to 20.  
* Turn ends when player rolls a 1 or chooses to hold.  
* If you roll a 1, you lose all points earned during the turn.  
* If you hold, you save all points earned during the turn.
```

### Specifications

- Read from the provided file named *lab9\_rules.txt*. Read the file from the same directory that your source code is in.
- Your program should read the text file and display it on the console.
